Notes

- All prices in EUR (€).
- All prices are excluding shipping costs EXW Altnau, Switzerland, VAT and all bank transfer fees.
- In case of lost or stolen dongles, a new license needs to be purchased.
- Price list valid until ErgoSoft announces new standard price list by email. Old standard prices honored for 30d after new standard price list is released.
- Prices are subject to change without notice. ErgoSoft reserves the right to correct any errors, inaccuracies or omissions at any time.

Option Pack SE	
Density: Re-Linearisation	Ability to relinearize the color density curves.
Print Environment: Import	Import existing Print Environments.
White Ink: Basic	Usage of white inks. Includes linearization options, use white as spot color, generate white pixel automatically based on raster data.
Color Replace: Basic	Allows replacement of specific colors in an image. Basic features only permit manual entry of replacement colors.
Shrinkage Correction	Adjusts printed image size to compensate for percentage of material shrinkage.
Tiling	Automatic or manual tiling of images.
Option Pack Full	
Density: Create Linearisation	Capability to create new density linearisations including ink channel limiting.
Print Environment: Create	Create and edit Print Environment settings for a new printer.
White Ink: Pro	Use transparency mask, limit density, point reduction; generate spot color based on image data.
Color Replace: Pro	Allows replacing color in images using Swatchbooks and Named Colorbooks. Automatic spot color replacement in PostScript files.
Image Add-Ons	Standard Image Add-Ons like individual eyelet marks, dashed cutting line etc.
Canvas Wrap	Produces adjustable mirroring of image margin to facilitate easy wrapping of the printed image on a canvas frame.
Image Presets	Automation feature. Allows to combine Image Format, Print Marks, Image Add-Ons, Image Margin, Crop, Tiling, Tune etc. as a set and to use it on specific images.
Picture Packages	Place multiple copies of a single image on a page in a predefined layout. Individual image copies can be scaled to different percentages.
Position Templates	Allows creating a template job including placeholders (Image Format, Position etc.). Template Job can be filled with different images.
User Right	Controls access to specific parameters in the RIP and prevents accidental changes to printer settings. 2 available levels: Administrator / User.
Maintenance Jobs	Controls when to perform printer maintenance jobs either before each job or after a specific time, number of copies, number of jobs, or amount of material printed.
Option Pack Extended	
Quality Control	Reports color difference (Delta E) statistics to assess the accuracy of printed colors to an expected color values.
<i>Production Features</i>	
Job Cost Calculation	The Job Costing / Job Cost Estimation calculates the ink, material, and printer cost per Job.
Job Tickets	Job Tickets are HTML Documents containing all relevant information about a job.
Job Processing Policies	The Job Processing Policies allow you to setup processing rules and settings for preflight, printing and job archiving.
Job Preflight	Preflight Feature allows creating hard and soft proofs.
HotFolder	Capability to create hot folders for batch printing of jobs with the same printer and cutter settings.
Advanced Feature	
Repeat Print (Print without Gap)	Prints multiple copies of a job without a visible printed gap between each copy.
Seam Extension	Mirrors all image margins to a specified size to create a seam.
Separation Print	Creates separation jobs. Creates color separation of the imported images automatically. Individual angle, shape, frequency, dot gain curve and separation profile.
ErgoSoft Variable Data	Creates a special image template which allows printing multiple copies of a specific design with personalized text or consecutive numbers.
Delta Automation XML	Professional implementation of a XML Interface to the Ergosoft RIP Products.
Textile Feature	
Color Books/D65 Support	Generates printable color book jobs defined either in RGB dimensions or in Lab slices. / Supports additional D65 Illumination Standard.
Multink	Provides option in Print Environment to setup custom ink assignments with same ink in different channel slots.
Step & Repeat	Permits importing a pattern or image and repeat it several times in the vertical and horizontal directions with options for mirroring and shifting pattern.
ColorCombine	Allows an image created with multiple grayscale or bitmap layers or separations to be imported and colored.
ColorGPS Profiler	
4 Colors	Color Profile Creation Tool that creates color profiles for RGB and CMYK color printers.
6 Colors	Color Profile Creation Tool that creates color profiles for RGB and CMYK+2 color printers.
8 Colors	Color Profile Creation Tool that creates color profiles for RGB and CMYK+4 color printers.
Advanced Features	Provides additional color tools for profile contrast, gamut mapping parameters and color intensity with ColorGPS.
RIPServer	
1 RIPServer	1 RIPServer. Performs the raster and ripping process for a single job at a time.
2 RIPServers	2 RIPServers. Performs the raster and ripping process for up to two jobs at a time.
4 RIPServers	4 RIPServers. Performs the raster and ripping process for four jobs at a time.
PostScript® / PDF Engine	
ErgoSoft PostScript® / PDF	Includes Postscript® Level III RIP capability and Postscript / PDF Color Management.
Adobe® PDF Print Engine 2.5	Ensures fast, reliable, and consistent printing even for complex PDF designs.
PrintClient	
1 PrintClient	1 PrintClient. Controls the transfer of ripped jobs to a single printer.
2 PrintClients	2 PrintClients. Controls the transfer of ripped jobs for up to two printers.
4 PrintClients	4 PrintClients. Controls the transfer of ripped jobs for four printers.
Cut Feature	
Cut: Roll	Allows direct cutting of jobs from Job Composer. Includes all roll cutter drivers.
Cut: Flatbed	Provides option for cutting for Flatbed systems with cut marks. Includes all flatbed cutter drivers.
1 CutClient	1 CutClient. Controls the transfer of ripped jobs to a single cutter.
2 CutClients	2 CutClients. Controls the transfer of ripped jobs for up to two cutters.
4 CutClients	4 CutClients. Controls the transfer of ripped jobs for four cutters.
