Introduction

During the installation process, the **Trial Version** of the **ErgoSoft RIP** must be activated over the internet or prepared for later activation.

The following documentation describes the installation and different activation methods depending on the internet access status of the RIP computer.

- 1 Activation over the internet during the installation process**
In order to use this method, the computer on which the **ErgoSoft RIP** is being installed, must have access to the internet during the installation process.
- 2 Activating the ErgoSoft RIP later**
This method allows preparing for activation during the installation process and finishing the activation later.

Starting the Installation

Whether you received your installation setup on a CD or you downloaded it from our website, the installation process is the same. Please launch the installation wizard by selecting the installation of the **ErgoSoft RIP** in the main page of the installation CD or by double clicking on the downloaded setup.exe file.

Selecting the Installer Language

Before the installation process can begin you have to select which language the installation wizard should be displayed in. Please select the preferred language and confirm your selection by clicking the **OK** button.

The Installation Wizard

The wizard will guide you through the installation of the **ErgoSoft RIP**. It is recommended that you close all other applications before starting the setup. This will make it possible to update relevant system files without having to reboot your computer.

The installation process has several steps. Proceed from one step to the next one by clicking the **Next** button.

License Agreement

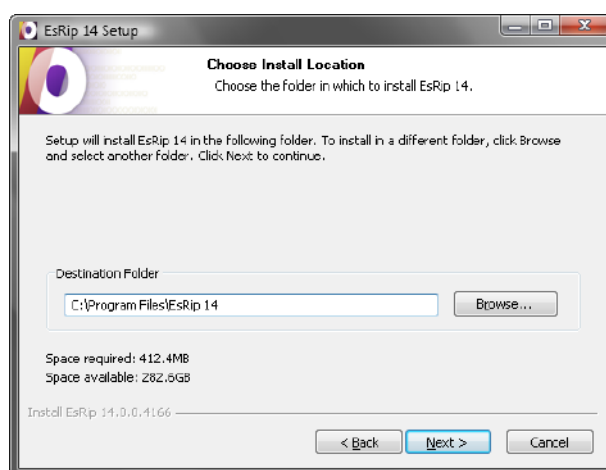

Please review the license terms before installing the **ErgoSoft RIP**. You must accept the agreement before installation will begin.

To accept the terms of the agreement, click **I Agree** and continue the installation.

Choose Location for Program

Choose the folder in which to install the **ErgoSoft RIP**. We suggest installing the software in the recommended **Destination Folder**. To install in a different folder, click **Browse** and select it.

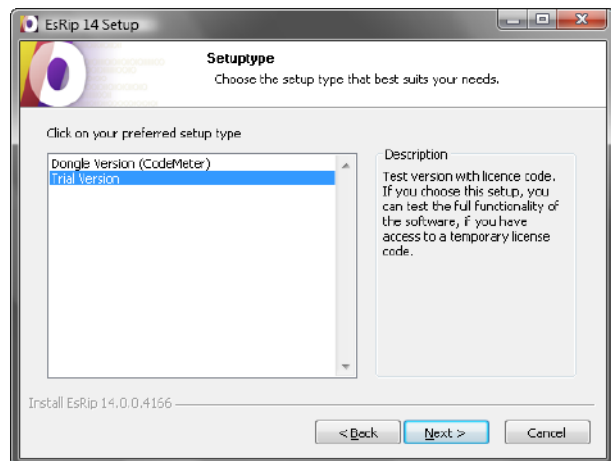

Please note, that in this step you specify the installation folder. The folder for the User Data can be defined later in the installation progress.

Select Setup Type

Select the setup type of the **ErgoSoft RIP**. Setup type "Dongle Version (Codemeter)" is the setup type for the retail version requiring a dongle (Codemeter) as well as a license. Setup type "Trial Version" is meant for a test version installation without dongle but will still require a license.

Now, select setup type **Trial Version** and click the **Next** button.

Choose Start Menu Folder

Choose the Start Menu folder for the **ErgoSoft RIP** shortcuts. We suggest installing the shortcuts into the recommended folder.

Once you specified the Start Menu folder you can start the installation of the software by clicking **Install**.

The installation of the software might take some time so please be patient.

Choose User Data Folder

During the installation, a dialog will be displayed which allows you to choose the location of the User Data Folder in which all User Data will be saved. If you change the suggested folder please make sure that you do not use the same directory as for any previous version. As you can see on the suggested folder it is possible to use a subfolder of the previous versions user folder EsRip.

Click **OK** to confirm the selected folder.

When a previous version has been installed on the same system, the installation offers the possibility to copy the user settings from this version.

Activating the ErgoSoft RIP and Completing Installation

Please follow the instructions given by the installation wizard. When being asked for the software protection activation, the next steps depend on the activation method:

1 When having access to the internet on the computer on which you install the **ErgoSoft RIP Trial Version**, click **Yes** and complete the installation as described in chapter "Activation during the Installation Process".

2 When not having access to the internet on the computer on which you install the **ErgoSoft RIP Trial Version**, you have to prepare the activation by clicking **No** and completing the installation as described in chapter "Activating the ErgoSoft RIP later".

Activation during the Installation Process

After having clicked the **Yes** button in the software protection activation window, the activation is done automatically as long as the internet can be accessed from the installation software.

Continue the installation until the Completing the Setup Wizard window is shown in which you click the **Finish** button to finish the installation.

Activating the ErgoSoft RIP later

After having clicked the **No** button in the software protection activation window, the activation must be done manually by preparing and performing it. When having a **License Voucher**, the activation and the license request can be done in the same procedure.

Preparing the Activation

For preparing the activation, a WibuCmRaC file must be saved for later use.

Click **Browse Folder** to access a dialog for navigating on your system in order to save the Protection Activation file somewhere you will be able to re-access it later.

Click the **Save** button and continue the installation until the Completing the Setup Wizard window is shown in which you click the **Finish** button to finish the installation.

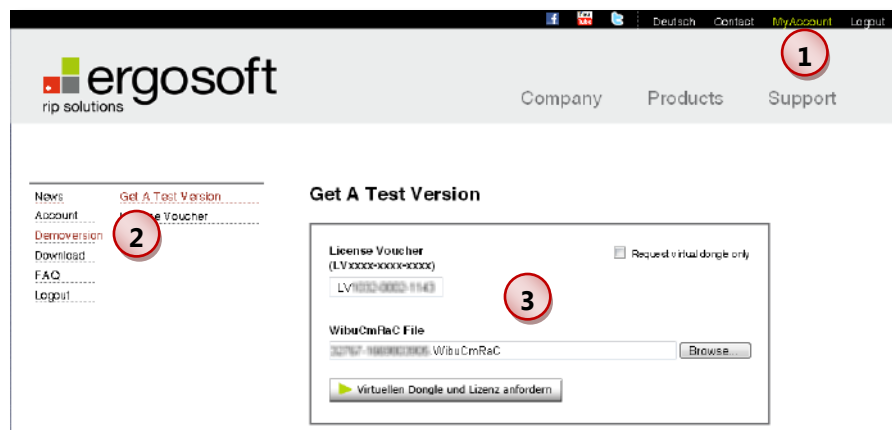

Performing the Activation (and Redeeming a License Voucher)

In order to perform the activation you need to copy the Protection Activation file to a data storage medium (e.g. USB stick) you can access from a computer with internet access.

1 On the computer with internet access, you have to login to your user account on the ErgoSoft homepage (or create a new user account). Go to page **MyAccount**.

2 Select **Demo-version** and **Get A Test Version**.

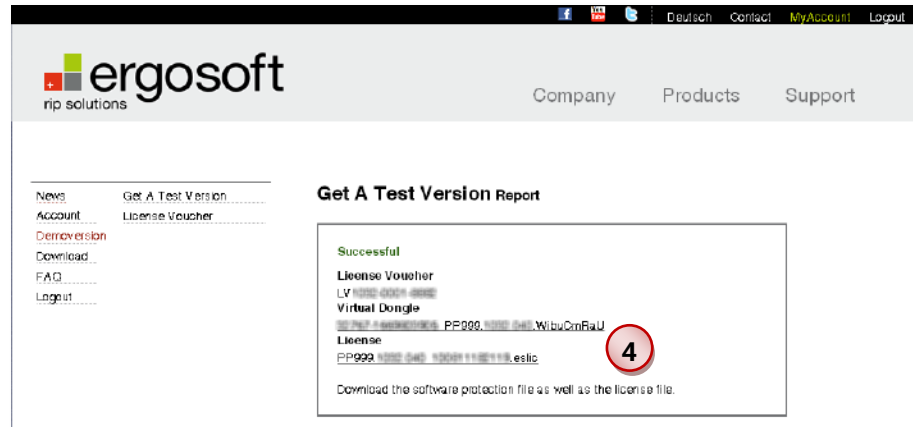

3 Enter the number of the **License Voucher** and select the Protection Activation file (**WibuCmRaC File**) you saved before. When done, click the **Request virtual dongle and license** button.

4 Wait until the **Virtual Dongle** file and the **License** file are created. Then, click the download links (file names) and save both files.

5 Copy the files to a data storage medium that

can be accessed from the computer on which the **ErgoSoft RIP Trial Version** is installed. The **license** file is needed later when the **ErgoSoft RIP Trial Version** is started the first time. The **Virtual Dongle** file is needed for finishing the activation.

Finishing the Activation

On the RIP computer (computer on which the **ErgoSoft RIP Trial Version** is installed), double-click the **Virtual Dongle** file WibuCmRaU. Confirm the displayed question with "Yes" and wait until the transfer is successfully finished.

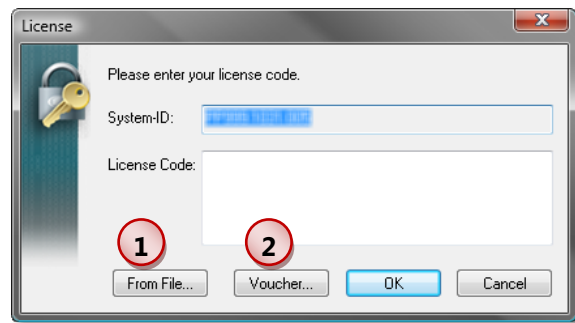

Now, the activation is finished and the **ErgoSoft RIP Trial Version** can be started.

Entering the License

Launch the **ErgoSoft RIP**. This will open the **License** dialog. The following depends on the method your license is provided:

Reading a License File

- 1 When your license has been provided by your reseller by sending you a **License file *.eslic14**, click the **From File** button, select the license file and click **OK**. The license will now be displayed in the **License Code** field. Start the **ErgoSoft RIP Trial Version** by closing the License dialog with **OK**.

Using a License Voucher

...with Internet Access from the RIP Computer

- 2 After having clicked the **Voucher** button, a dialog is displayed in which you have to enter the **voucher key** and click the **Request license** button to obtain the license automatically from the ErgoSoft web licensing system. The license is automatically entered into the **License** dialog. Start the **ErgoSoft RIP Trial Version** by closing the License dialog with **OK**.

... without Internet Access from the RIP Computer

When you do not have internet access from the RIP computer (computer on which the **ErgoSoft RIP Trial Version** is installed) you can obtain the license using the ErgoSoft web licensing method:

1 On the computer with internet access, you have to login to your user account on the ErgoSoft homepage (or create a new user account). Go to page **MyAccount**.

2 Select **Demo-version** and **License Voucher**.

3 Enter the number of the **License Voucher** and the **Dongle No./System ID** that is displayed in the **License** dialog of the **ErgoSoft RIP Trial Version**.

4 Enter your contact details (email and last name are required) and click the **Request** button.

5 Wait until the license is created. Then, click the **Download** link and save the license file.

6 Copy the license file to a data storage medium that can be accessed from the computer on which the **ErgoSoft RIP Trial Version** is installed.

Continue entering the license as described in chapter "Reading a License File".
